

Lightfold - A deconstructed page in a book

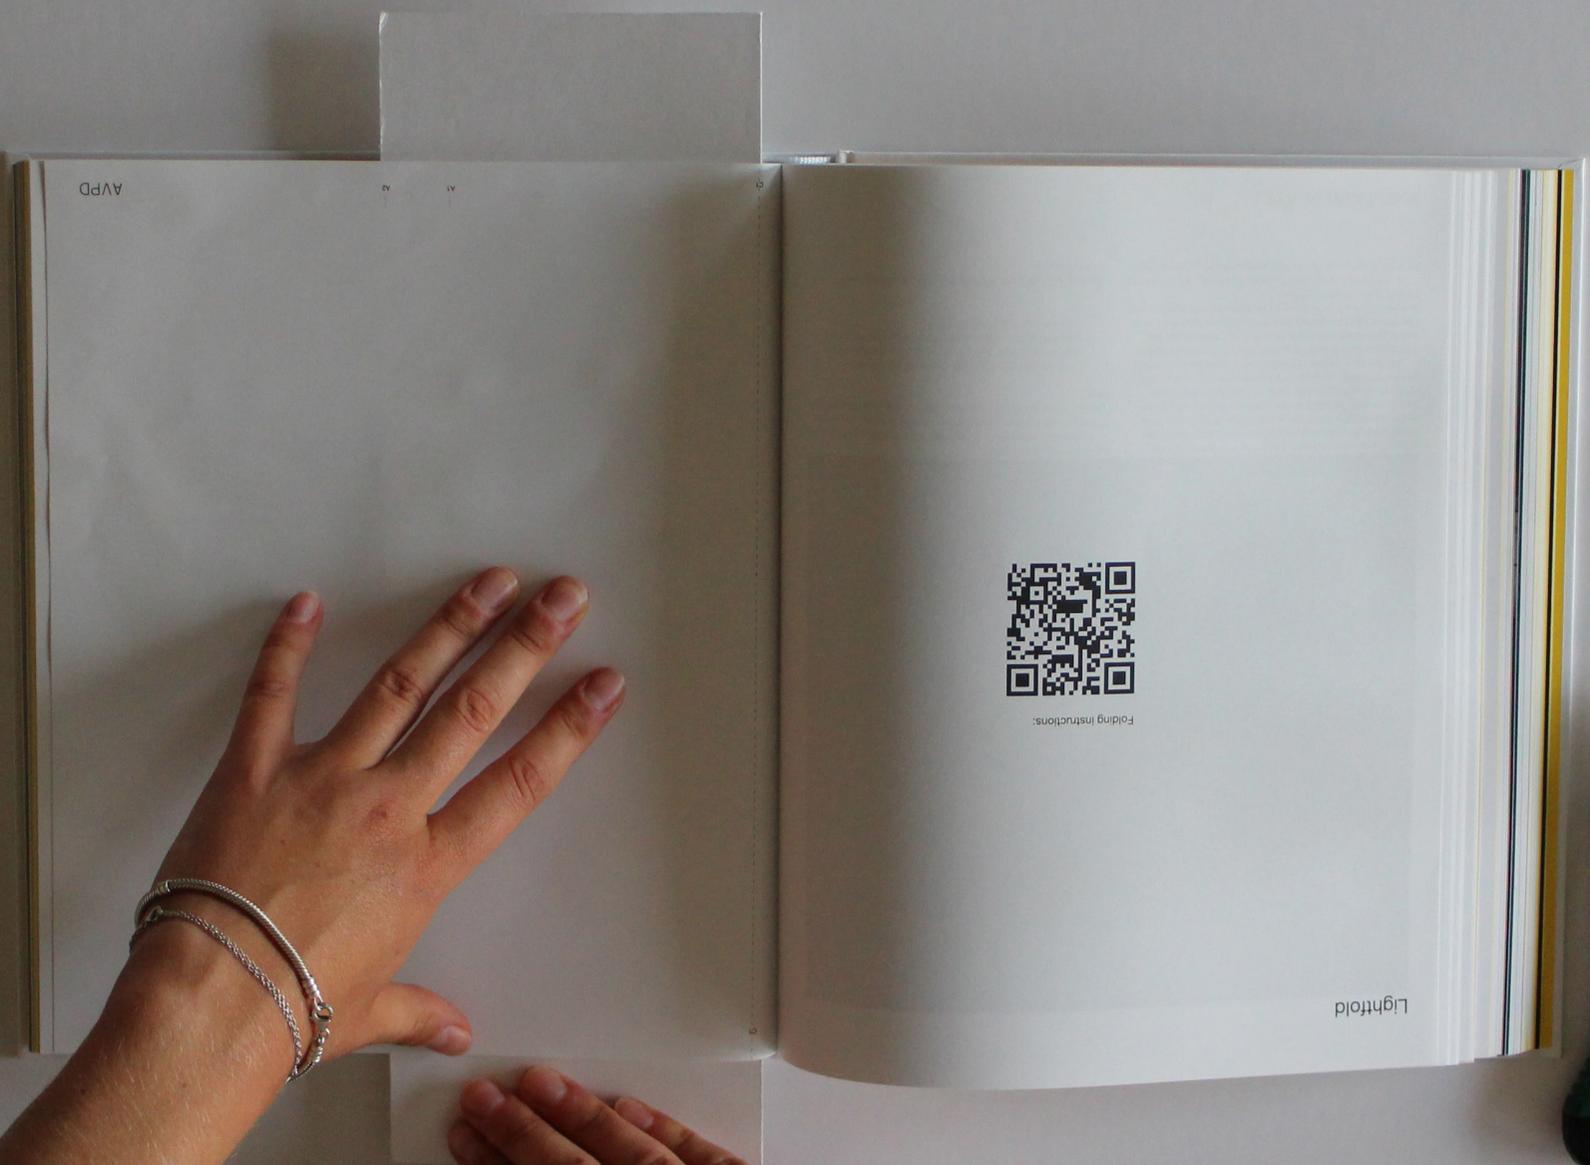

Tools: a hoppy knife, a ruler, and a sheet of cardborard

Open the book

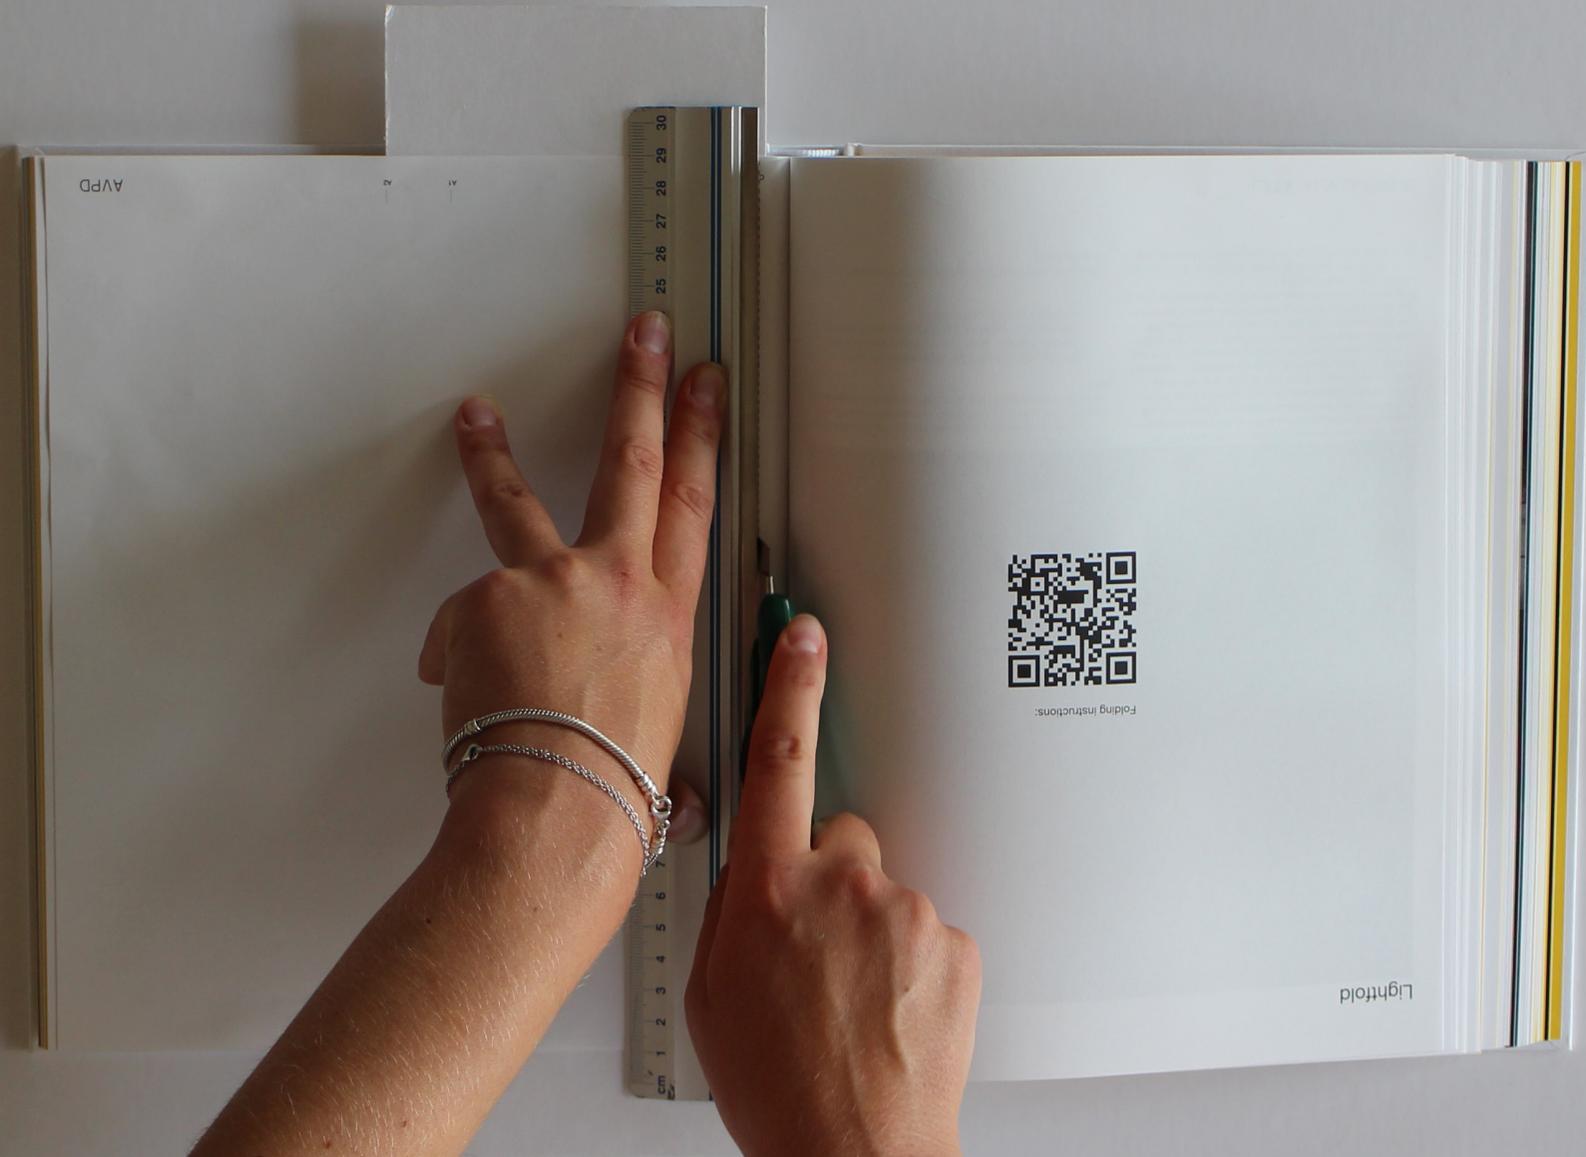

Turn the book upside down

Place the cardboard underneath the page

Put the ruler as a guide to cut the straight line

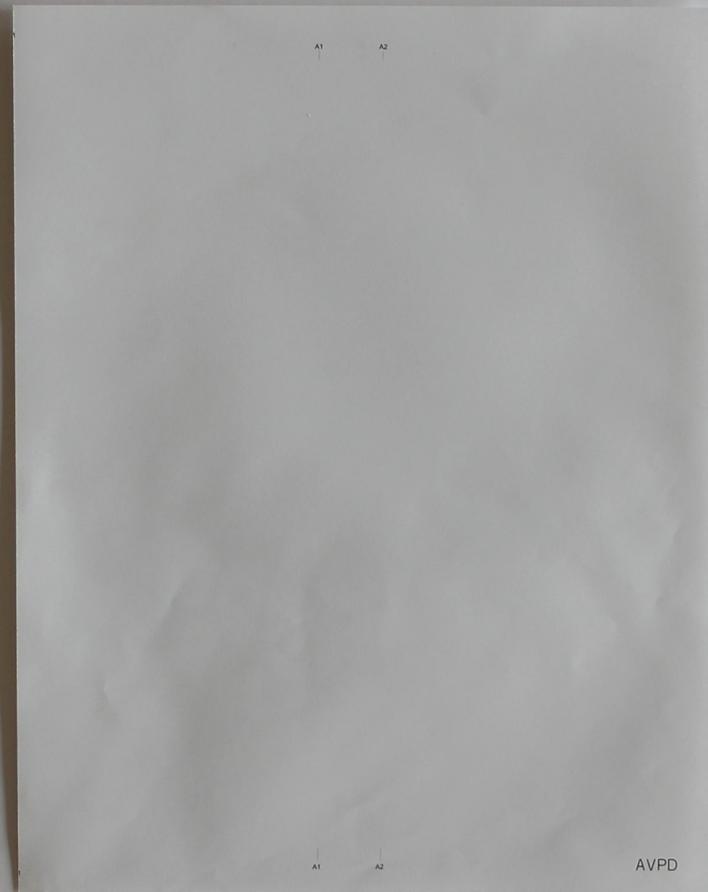

Use the knife and ruler to cut the page

The paper is detached from the book

With the paper in front of you

Gently curl the paper with your hands

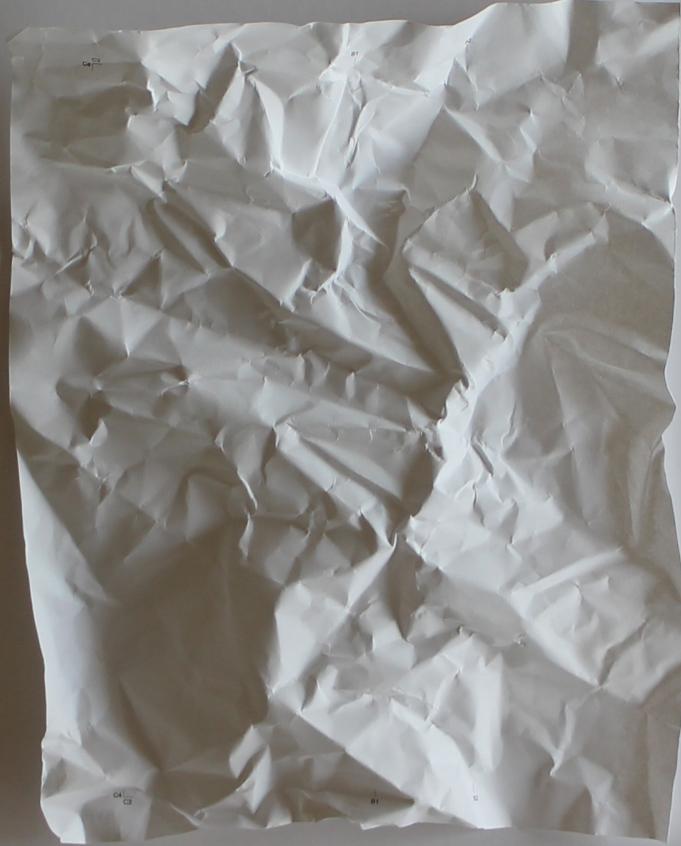

Until it looks like a ball

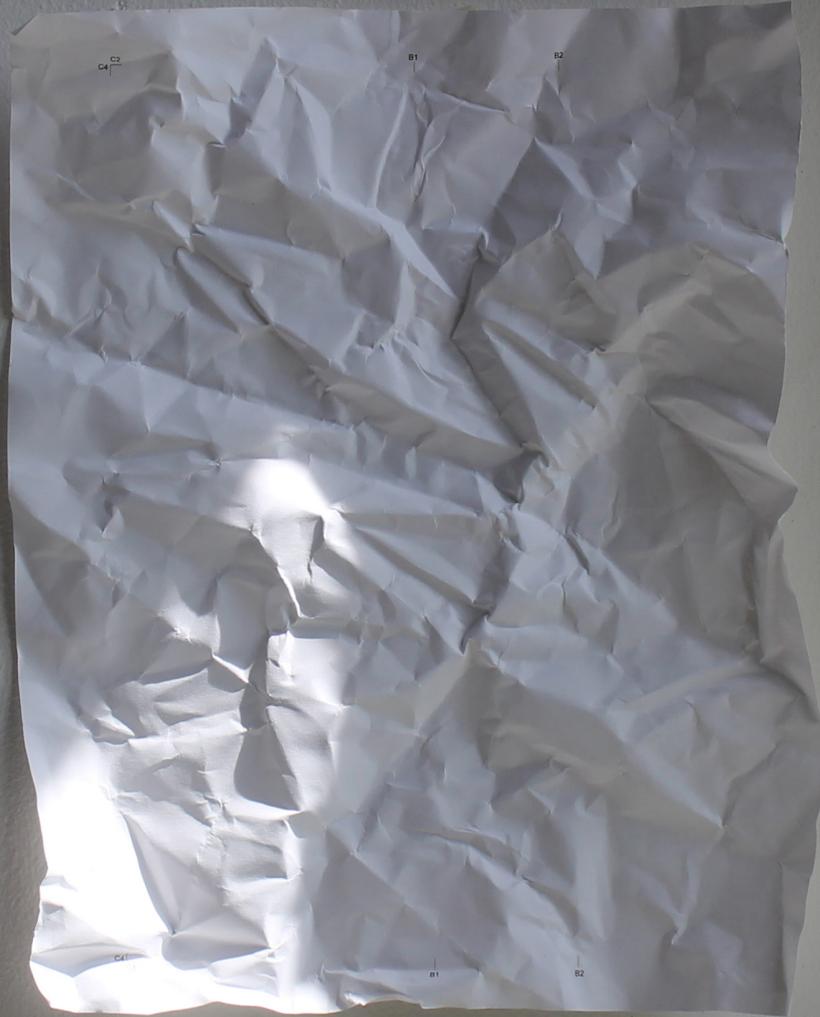

Then gently unfold the paper

Mount the paper on a wall next to a window

Over time you can observe how the broken surface  
of the paper changes its spatial shape
